SUMMARY

Senior Data Scientist with 12+ years of experience building and shipping production systems. Partnered with product and finance to turn exploratory analysis into three shipped pricing changes worth an estimated 6% margin gain. Comfortable owning problems end to end and working directly with product stakeholders.

WORK EXPERIENCE

Senior Data Scientist - Tata Consultancy Services
May 2022 - Present | Gurugram
- Partnered with product and finance to turn exploratory analysis into three shipped pricing changes worth an estimated 6% margin gain.
- Developed an ARIMA and Prophet based forecasting suite for weekly revenue planning across five business units.
- Designed and analysed 40+ A/B tests, building the sequential testing framework the growth team now uses by default.

Data Scientist - Publicis Sapient
Feb 2018 - Jan 2022 | Gurugram
- Designed and analysed 40+ A/B tests, building the sequential testing framework the growth team now uses by default.
- Built a customer lifetime value model in scikit-learn that reallocated 22% of paid acquisition budget toward higher-return channels.

Junior Data Scientist - Razorpay
Jun 2014 - Oct 2018 | Kochi
- Automated recurring statistical reporting in Python, saving roughly 25 analyst hours per month.

TECHNICAL SKILLS

Languages: Python, SQL, R programming
Analytics: statistics, hypothesis testing, A/B testing, causal inference, time series forecasting
ML: scikit-learn, XGBoost, machine learning, clustering
Tools: Pandas, matplotlib, seaborn, Tableau, Jupyter

PROJECTS

- Marketing mix model - Bayesian regression attributing revenue across 9 channels with credible intervals.
- Cohort retention dashboard in Tableau tracking 24-month retention curves for 3M users.

EDUCATION

B.Tech in Statistics
Amity University, 2013

CERTIFICATIONS

- Google Advanced Data Analytics Certificate
